

NOAA Weather Radio

302 W. Cotton St. | [Click here for map](#) [1]

NOAA Weather Radio (NWR) is a nationwide network of radio stations broadcasting continuous weather information direct from a nearby National Weather Service office. NWR broadcasts National Weather Service warnings, watches, forecasts and other hazard information 24 hours a day.

NWR now broadcasts warning and post-event information for all types of hazards both natural (such as earthquakes and volcano activity) and technological (such as chemical releases or oil spills). Working with other Federal agencies and the Federal Communications Commission's new Emergency Alert System, NWR is an "all hazards" radio network, making it the single source for the most comprehensive weather and emergency information available to the public.

For more information about Severe Weather Awareness Week, visit the [National Weather Service Website](#) [2].
